
One Page Business Plan Sample

One Page Business Plan Sample [Downloaded from web1.enteraskincare.com](http://web1.enteraskincare.com)
by Harrison & Khan

INTRODUCTION: WHY A ONE PAGE BUSINESS PLAN SAMPLE CAN TRANSFORM YOUR STARTUP

In the fast-paced world of entrepreneurship, time is your most valuable currency. While traditional business plans often stretch into dozens of pages, modern founders are discovering the power of brevity and focus. A one page business plan sample offers a clear, actionable framework that distills your vision into its purest form. Whether you are pitching to investors, aligning your team, or simply seeking clarity for yourself, a concise plan can cut through the noise and accelerate decision-making. This article will guide you through what a one page business plan is, why it matters, and how to craft one that drives results. You will also find a practical one page business plan sample that you can adapt for your own venture.

WHAT IS A ONE PAGE BUSINESS PLAN?

A one page business plan is a streamlined version of a traditional business plan. It captures the essential elements of your strategy — your value proposition, target market, revenue model, key metrics, and financial goals — all on a single sheet of paper. Unlike lengthy documents that can take weeks to complete, a one page plan forces you to prioritize what truly matters. It is a

living document that evolves with your business, making it ideal for startups, small businesses, and side projects.

This lean approach is inspired by methodologies like the Business Model Canvas and the Lean Startup framework. A well-crafted one page business plan sample typically includes the following core sections:

- **Value Proposition:** What problem do you solve and for whom?
- **Target Market:** Who are your ideal customers?
- **Solution:** How does your product or service address the problem?
- **Revenue Streams:** How will you make money?
- **Key Metrics:** How will you measure success?
- **Competitive Advantage:** What makes you different?
- **Financial Needs:** How much funding do you require and for what purpose?
- **Milestones:** What are your key goals and timelines?

WHY CHOOSE A ONE PAGE BUSINESS PLAN OVER A TRADITIONAL PLAN?

Many entrepreneurs wonder if a single page can truly capture the complexity of a business. The answer is yes — and often it is more effective. Here are the key benefits of using a one page business plan sample as your strategic tool:

Clarity and Focus

When you limit yourself to one page, every word counts. You are forced to articulate your business idea in its simplest form, which often reveals gaps or inconsistencies in your thinking. This clarity is invaluable for both founders and stakeholders.

Speed and Agility

Traditional business plans can take months to write and are often outdated before they are finished. A one page plan can be drafted in a few hours and updated in minutes. This agility is crucial in fast-moving markets where conditions change rapidly.

Investor Appeal

Investors and venture capitalists review hundreds of pitches each year. A concise, compelling one page business plan sample demonstrates that you respect their time and can communicate your vision efficiently. It serves as a powerful prelude to a more detailed pitch deck.

Team Alignment

Sharing a one page plan with your team ensures everyone is on the same page — literally. It aligns your co-founders, employees, and advisors around a common set of priorities and goals.

Ease of Iteration

Because it is short and simple, you can revise your one page plan as you learn from customer feedback, market shifts, or new opportunities. This iterative process keeps your strategy fresh and relevant.

ESSENTIAL COMPONENTS OF A ONE PAGE BUSINESS PLAN SAMPLE

To create an effective one page plan, you need to include the right elements without overwhelming the reader. Below is a breakdown of each component, along with practical tips for writing them.

Value Proposition

Start with a clear statement of the value you deliver. What specific problem do you solve? Who experiences this problem? A strong value proposition is specific, customer-focused, and differentiated. For example: "We help freelance designers save 10 hours per week on administrative tasks using automated invoicing and project management."

Target Market

Define your ideal customer profile. Include demographics, psychographics, and behavioral traits. The more specific you are, the easier it will be to tailor your marketing and product development. A common mistake is being too broad. Instead of "small businesses," consider "independent coffee shops in urban areas with 5-15 employees."

Solution

Describe your product or service and explain how it solves the problem. Focus on the benefits, not just features. Use simple language that anyone can understand. If possible, include a brief example or use case.

Revenue Streams

How will your business generate income? Common revenue models include subscriptions, one-time sales, licensing, advertising, or affiliate commissions. Be realistic about your pricing and projected volume.

Key Metrics

Identify the numbers that matter most to your business. These might include customer acquisition cost (CAC), lifetime value (LTV), monthly recurring revenue (MRR), churn rate, or conversion rate. Choose 3-5 metrics that directly reflect your progress toward your goals.

Competitive Advantage

What makes your business unique and defensible? This could be proprietary technology, exclusive partnerships, brand reputation, or a unique business model. Be honest about your competition and explain why customers will choose you.

Financial Needs

If you are seeking funding, specify how much you need, how you will use it, and what milestones you expect to achieve. Even if you are bootstrapping, it is helpful to outline your break-even point and key financial assumptions.

Milestones

List 3-5 major milestones for the next 6-12 months. These should be specific, measurable, and time-bound. Examples include launching a minimum viable product (MVP), acquiring 100 paying customers, or securing a strategic partnership.

A PRACTICAL ONE PAGE BUSINESS PLAN SAMPLE

To help you visualize how these components come together, here is a one page business plan sample for a fictional company called **EcoClean**, a subscription-based eco-friendly cleaning service for urban apartments.

EcoClean: One Page Business Plan

Value Proposition: EcoClean provides busy urban professionals with a reliable, eco-friendly apartment cleaning service that uses only non-toxic, biodegradable products. We save our customers time and give them peace of mind, knowing their home is clean and safe for their family and the planet.

Target Market: Environmentally

conscious professionals aged 25-45 living in rented or owned apartments in major metropolitan areas. They value convenience, sustainability, and trust. They are willing to pay a premium for services that align with their values.

Solution: A subscription-based cleaning service with three tiers (Basic, Standard, Premium). Customers book online, receive a consistent cleaner, and enjoy 100% satisfaction guarantee. All cleaning products are plant-based, and we use microfiber cloths to reduce waste.

Revenue Streams: Monthly subscriptions starting at \$99 for a one-bedroom apartment. Additional services like deep cleaning and refrigerator cleaning are available for an extra fee. We also plan to offer retail sales of our cleaning product line in the future.

Key Metrics: Monthly Recurring Revenue (MRR), Customer Acquisition Cost (CAC), Lifetime Value (LTV), Churn Rate, and Net Promoter Score (NPS). Our target is to achieve a 3:1 LTV to CAC ratio within the first year.

Competitive Advantage: Unlike traditional cleaning services that use harsh chemicals, EcoClean is certified by the Green Seal organization and partners with local environmental nonprofits. Our brand is built on transparency and sustainability, which resonates with our target market.

Financial Needs: We are seeking \$50,000 in seed funding to cover initial marketing, product inventory, and technology development for our booking platform. We project break-even within 12 months.

Milestones: (1) Launch MVP in one city (New York) within 3 months. (2) Acquire 100 active subscribers by month 6. (3)

Expand to a second city (San Francisco) by month 9. (4) Achieve \$100,000 MRR by month 12.

HOW TO CREATE YOUR OWN ONE PAGE BUSINESS PLAN

Now that you have seen a one page business plan sample, it is time to create your own. Follow these steps to craft a document that works for your unique business.

Step 1: Start with Your Value Proposition

Answer these questions: Who is your customer? What problem do they have? How do you solve it in a way that is unique or better than alternatives? Write one or two sentences that capture this.

Step 2: Define Your Market

Be specific about who you serve. Use data if available. If you are in the early stages, make educated estimates based on research. The more precise you are, the easier it will be to target your marketing.

Step 3: Describe Your Solution

Outline your product or service. Focus on the outcome you deliver. Avoid jargon and technical details unless they are essential. Remember, this plan may be read by investors or partners who are

not experts in your field.

Step 4: Choose Your Revenue Model

Decide how you will charge customers. Will it be a one-time fee, subscription, or pay-per-use? Consider your pricing relative to competitors and your target audience's willingness to pay.

Step 5: Identify Key Metrics

Select 3-5 metrics that will tell you whether your business is healthy and growing. These should be actionable and directly tied to your goals. For example, if you are a SaaS business, MRR and churn are essential. If you are a retailer, foot traffic and average order value matter.

Step 6: Articulate Your Competitive Advantage

Why will customers choose you? Is it your price, quality, convenience, brand, or something else? Be honest about your weaknesses too, but frame your

advantage in a compelling way.

Step 7: Outline Financial Needs and Milestones

If you need funding, specify the amount and how you will use it. Then list 3-5 milestones for the next 6-12 months. Make them specific and measurable, such as "launch beta version" or "reach 500 users."

Step 8: Review and Simplify

Read your one page plan aloud. Is everything clear? Can you explain it to a stranger in under two minutes? Cut any unnecessary words. Your goal is to communicate your vision with absolute clarity.

TIPS FOR SUCCESS WITH YOUR ONE PAGE BUSINESS PLAN

- **Use bullet points and short sentences:** This makes your plan easy to scan and understand quickly.
- **Update it regularly:** A one page plan is a living document. Revisit it monthly to reflect new insights and changes.
- **Share it with trusted advisors:**
